

How to install software onto USB

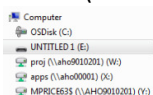

Please select the appropriate software as per instruction provided.

All remaining vehicles pending for FSA R1208, will require the Dealer to download **“FSA R1208 ICC Software Update Only”** onto their existing FSA USB drive following the instructions below.

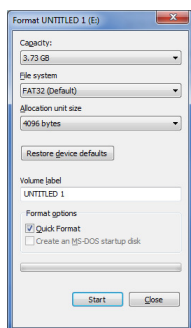

All other vehicles pre Job 3.4 (Job 2.5, Job 2.6, 3.0, 3.1, 3.2 and 3.3), including completed FSA Cars, that need to be updated, will require Dealer to download **“Version 3.4 ICC Software”** onto a new USB drive (Dealer to source) following the instructions below.

Please note: Use of the incorrect level of ICC Software will result in permanent damage to the ICC. The Dealer will not be able to recover the ICC and it will require a new replacement ICC at Dealer expense. Please ensure the correct software file is being used as detailed above.

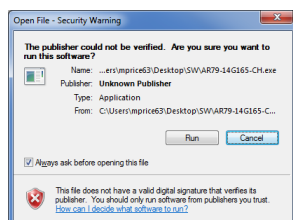

1. Insert USB into Computer USB port go to “my computer” and right click on USB drive icon (shown below) and then click on format.

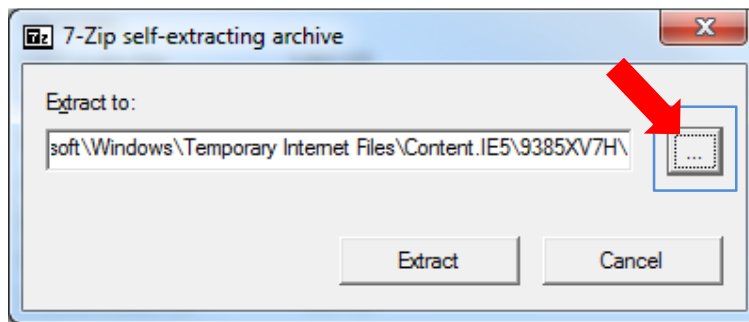

2. When the format pop up box displays, ensure it is 'FAT32'

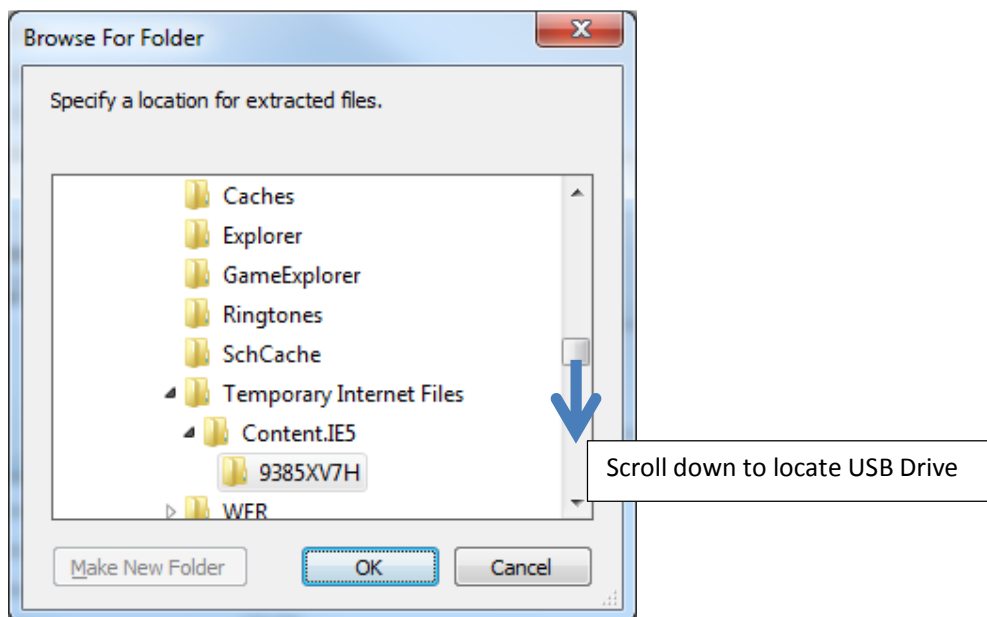

3. Select start to format. This will erase all data on the USB and will ensure it is ready for the files.
4. Click on the required software file link and select “Run”. Software .exe. file will now be downloaded to a temp folder on your PC. When the download is complete the following screen shot will be displayed.

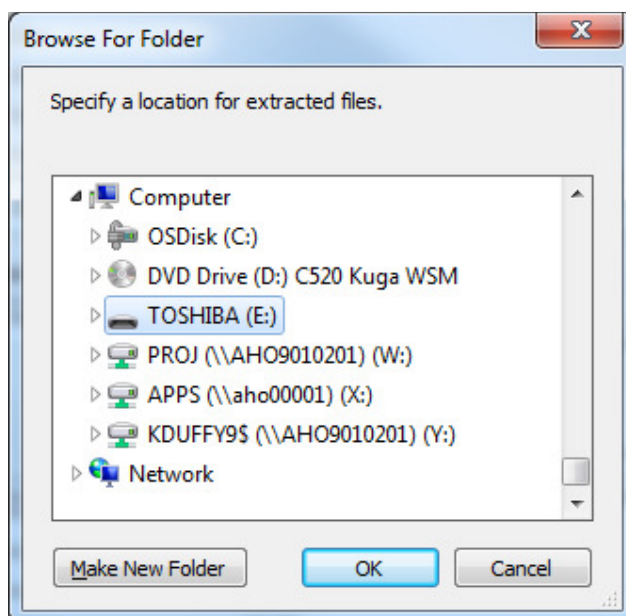

5. Select 'Run' as above.
6. Following screen will appear

7 Click highlighted button to browse for folder

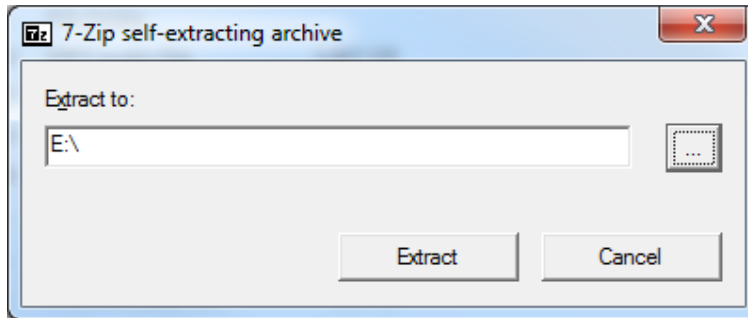

8 Scroll to find USB drive

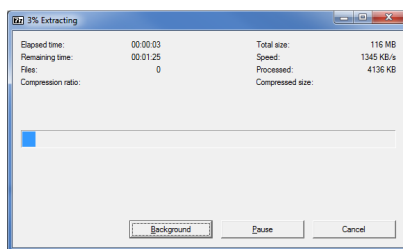

9 Click OK

Your USB drive will be displayed in the window below.

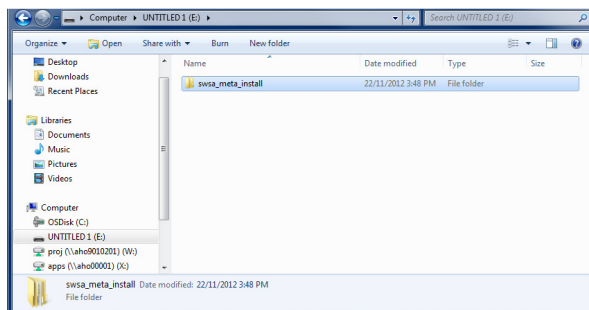

Click Extract

10 Application folder will now extract.

11 Once completed, the USB will contain one folder (swsa_meta_install) as below.

12 USB is now ready to use.
